CAREER SUMMARY

Senior Product / UIUX Designer with 9+ years of experience in **hardware-software ecosystem integration, consumer products, enterprise systems, and cross-platform applications**. Skilled in crafting design systems, user flows, and high-fidelity interfaces for Web, Mobile, Tablet, and hardware-integrated platforms. Experienced in leading design projects and collaborating with PMs, software engineers, and cross-functional stakeholders. Strong expertise in user-centered design, visual design, usability testing, with a portfolio that includes energy swapping systems, diagnostic tools, e-commerce platforms, and international brand identity projects.

EXPERIENCE

- Sr. UI/UX Designer | LINE Bank** May 2025 – Present
 - Transformed existing Korean UI pages into a unified, scalable design system with modular **Component Guidelines**, ensuring cross-platform consistency.
 - Refined user flows from a user-centric perspective and created motion graphics and illustrations to lower user friction and effectively support marketing objectives.
- Sr. Product Designer | Gogoro Inc.** Jul 2022 – May 2025
 - Designed and delivered cross-platform solutions spanning **hardware terminals, vehicle displays, mobile apps, and web/back-end systems**, from concept and rapid prototyping through high-fidelity delivery (Figma, After Effects).
 - Conducted **usability testing** and iterative refinements to ensure design quality and accessibility.
 - Collaborated with **Industrial Designers, Marketing, PMs and HW/SW engineers** to unify physical touch points and digital interfaces across scooter display and mobile apps.
 - GoStation Battery Swap + Issue Reporting** - Designed and shipped GoStation fault reporting that locks a faulty battery and dispenses a replacement on the spot, removing the customer-service call as riders' only recourse. An 11-participant usability test helped us identify key points that misguided users; support calls for battery faults roughly halved after launch.
 - Scooter Diagnostic System** - Redesigned the technician diagnostic tool's interface and information hierarchy; shipped and in daily use across service stores. Field interviews reframed the project from SOP enforcement to workflow consolidation.
 - Scooter Touch Screen + Third Party Platform Integration** - Designed a connectivity and hand-off flow on the scooter touch display to an external platform's fixed specification, reconciling it with Gogoro's existing dashboard design language. (Unreleased; under NDA)
- UI/UX Design Lead | Cloud Interactive** Jul 2018 – Jun 2022
 - Led a design team of up to 4 designers, delivering **Web, Mobile, and Back-End applications** across industries including engineering, healthcare, e-learning, order management, and private cloud platforms.
 - Conducted stakeholder interviews, designed workflows, wireframes, and prototype testing.
 - Collaborated with System Analysts and developers to balance usability, aesthetics, and technical feasibility.
 - CEC Cloud Manage System** - Designed a cross-platform form management system replacing paper-based reporting, including permission management, template controls, and mobile on-site submission.
 - BTOX Online Order System** - Unified domestic and overseas platforms, improving readability, visual hierarchy, and communication efficiency between sales and doctors.
- Creative Designer | Eight Reach Net Ltd.** Feb 2018 – Jul 2018
- Web Designer | Collins Software Ltd.** Jun 2016 – Nov 2017
- Web Design Assistant | Polaris Creative Integration Ltd.** Aug 2015 – Jun 2016

CORE COMPETENCIES

- Information Architecture & Wireframing
- Prototyping & Motion/Interaction Design
- Usability Testing & Iterative Refinement
- Cross-Functional Collaboration
- Visual Design & Typography
- Cross-Platform UI (Web, Mobile, Tablet)

TECHNICAL SKILLS

- Figma (UI, Prototyping, Design System)
- Adobe Photoshop, Illustrator, After Effects
- Motion & Micro-Interaction Prototypes
- Usability Testing Tools
- Basic HTML/CSS for developer handoff
